

# Linea

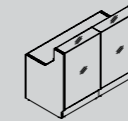

**Minimalism supported by a flash of glass – Linea reception desk proves that less means more.**

A simple shape is ornamented by the aluminium finishes whereas the backlight of the lower part emphasizes the glass front. Linea has a modern character, but its universal design makes the reception an interesting accent even in more classic interiors. Thanks to the modular construction, it is easy to create a customized

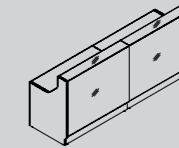

straight or corner layout depending on the space and needs. The low module, designed mainly for disabled customers, works particularly well in the places where the contact with the client tends to be long. Moreover, the extended worktop is increasing functionality. On the other hand, the high module allows working in a standing position. A spacious louver closet or small lockers on the worktop can help to organize the documents.
