1

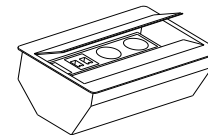

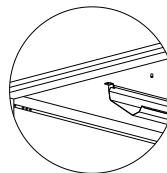

LEG & BEAMS

This table combines 2 different materials: ST12 steel with 80x80 + 80x20mm epoxy paint on the legs and epoxy paint or stainless steel AINSI 304 of 40x20mm in the beams connecting the legs. This combination adds a stylish touch to the table. Available with single and double tables (intermediate leg).

2

ELECTRIFICATION ; CABLE MANAGEMENT ; ACCESSORIES

Metal double cable tray is available. These have direct access from the top thru various solutions: Grommets & Flip-top (metal or melamine). Metal rail to hide cables from floor to cable tray.

3

TOP

Melamine or White HPL is the choice for the table. These provide flexibility in terms of use or location of the table because of the different hard-wearing materials. In terms of available colors, we are talking about 10 options, ranging from plain to wood imitations. The thickness used is 19 for melamine and HPL.

4

DIMENSIONS

The table reaches a height of 1050mm. The widths available are as follows in mm: 800 ; 1000 ; 1200. In terms of lengths the options in mm are: 1200, 1400, 1600, 1800, 2000 on single table and 2400, 2800, 3200, 3600, 4000 in double (with intermediate leg).
